

Model SST15-832

**Most compact VON Cable Fault Locator**

**Full function radar standard**

**Simple two step operation**

**High energy for reliable operation**

**Full featured cable fault location and sectionalizing for primary cable faults**

**Highest Voltage and Loudest Thump of comparably sized units**

| <b>SST15-832 Specifications</b> |                                                                                                                                 |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------|
| Voltage                         | 0-15kV                                                                                                                          |
| Energy                          | 832 Joules                                                                                                                      |
| Leads                           | 15' High Voltage Lead with MC connection, 15' Ground Lead                                                                       |
| Dimensions                      | 22" x 18" x 12", 67 lbs. (71 lbs with Std. Attachments)<br>Built in Hand Cart Standard.                                         |
| <b>TDR Specifications</b>       |                                                                                                                                 |
| Auto Analyze                    | Automatically marks end of cable, transformer locations, and fault location and gives distances.                                |
| Screen                          | 3.5" (8.9cm) x 4.5" (11.4cm) LCD with 320x240 dot matrix – Backlight Visible in Bright Light                                    |
| Environmental                   | Radar contained within the case of the thumper allowing all weather operation. Operable from -25° F (-31° C) to 110° F (43° C). |
| Accuracy                        | 0.5% of the range selected                                                                                                      |
| Software Features               | FULL TDR with Footage readings and trace to confirm, Instant on, no boot sequence.                                              |
